Attributes

You can't change the sign-in and attribute options on this page after you've created your user pool. Make sure that you've decided on the settings that you want.

How do you want your end users to sign in?

You can choose to have users sign in with an email address, phone number, username or preferred username plus their password. [Learn more.](#)

☐ Username - Users can use a username and optionally multiple alternatives to sign up and sign in.

☐ Also allow sign in with verified email address

☐ Also allow sign in with verified phone number

☐ Also allow sign in with preferred username (a username that your users can change)

☒ Email address or phone number - Users can use an email address or phone number as their "username" to sign up and sign in.

☒ Allow email addresses

☐ Allow phone numbers

☐ Allow both email addresses and phone numbers (users can choose one)

You can choose to enable case insensitivity on the username input for the selected sign-in option. For example, when this option is selected, the users can sign in using either "username" or "Username".

☒ (Recommended) Enable case insensitivity for username input

Which standard attributes do you want to require?

All of the standard attributes can be used for user profiles, but the attributes you select will be required for sign up. You will not be able to change these requirements after the pool is created. If you select an attribute to be an alias, users will be able to sign-in using that value or their username. [Learn more about attributes.](#)

Required	Attribute	Required	Attribute
<input checked="" type="checkbox"/>	address	<input type="checkbox"/>	nickname
<input checked="" type="checkbox"/>	birthdate	<input checked="" type="checkbox"/>	phone number
<input checked="" type="checkbox"/>	email	<input checked="" type="checkbox"/>	picture
<input checked="" type="checkbox"/>	family name	<input type="checkbox"/>	preferred username
<input checked="" type="checkbox"/>	gender	<input checked="" type="checkbox"/>	profile
<input checked="" type="checkbox"/>	given name	<input checked="" type="checkbox"/>	zoneinfo
<input type="checkbox"/>	locale	<input checked="" type="checkbox"/>	updated at
<input type="checkbox"/>	middle name	<input type="checkbox"/>	website
<input checked="" type="checkbox"/>	name		

Do you want to add custom attributes?

Enter the name and select the type and settings for custom attributes.

What password strength do you want to require?

Minimum length

8

☒ Require numbers

☒ Require special character

☒ Require uppercase letters

☒ Require lowercase letters

Do you want to allow users to sign themselves up?

You can choose to only allow administrators to create users or allow users to sign themselves up. [Learn more.](#)

☒ Only allow administrators to create users

☐ Allow users to sign themselves up

How quickly should temporary passwords set by administrators expire if not used?

You can choose for how long until a temporary password set by an administrator expires if the password is not used. This includes accounts created by administrators.

Days to expire

15

Do you want to enable Multi-Factor Authentication (MFA)?

Multi-Factor Authentication (MFA) increases security for your end users. If you choose "optional", individual users can have MFA enabled. You can only choose "required" when initially creating a user pool, and if you do, all users must use MFA. Phone numbers must be verified if MFA is enabled. You can configure adaptive authentication on the Advanced security tab to require MFA based on risk scoring of user sign in attempts. [Learn more about multi-factor authentication.](#)

Note: separate charges apply for sending text messages.

☒ Off

☐ Optional

☐ Required

How will a user be able to recover their account?

When a user forgets their password, they can have a code sent to their verified email or verified phone to recover their account. You can choose the preferred way to send codes below. We recommend not allowing phone to be used for both password resets and multi-factor authentication (MFA). [Learn more.](#)

☐ Email if available, otherwise phone, but don't allow a user to reset their password via phone if they are also using it for MFA

☐ Phone if available, otherwise email, but don't allow a user to reset their password via phone if they are also using it for MFA

☒ Email only

☐ Phone only, but don't allow a user to reset their password via phone if they are also using it for MFA

☐ (Not Recommended) Phone if available, otherwise email, and do allow a user to reset their password via phone if they are also using it for MFA.

☐ None - users will have to contact an administrator to reset their passwords

Which attributes do you want to verify?

Verification requires users to retrieve a code from their email or phone to confirm ownership. Verification of a phone or email is necessary to automatically confirm users and enable recovery from forgotten passwords. [Learn more about email and phone verification.](#)

☒ Email

☐ Phone number

☐ Email or phone number

☐ No verification

You must provide a role to allow Amazon Cognito to send SMS messages

Amazon Cognito needs your permission to send SMS messages to your users on your behalf. [Learn more about IAM roles.](#)

New role name

Do you want to send emails through your Amazon SES Configuration?

Select Yes if you require higher daily email limits otherwise select No. [Learn more about Cognito daily email limits](#). If you choose Yes, Cognito will send emails through your Amazon SES configuration. [Refer to this documentation for additional steps](#).

☐ Yes - Use Amazon SES
*Requires IAM email address ARN

☒ No - Use Cognito (Default)

Do you want to customize your email verification messages?

You can choose to send a code or a clickable link and customize the message to verify email addresses. [Learn more about email verification](#).

Verification type
☒ Code ☐ Link

Email subject
Your verification code

Email message
Your verification code is (###).

You can customize the message above and include HTML tags, but it must include the "(###)" placeholder, which will be replaced with the code.

Do you want to customize your user invitation messages?

SMS message
Your username is (username) and temporary password is (###).

You can customize the message above and include HTML tags, but it must include the "(username)" and "(###)" placeholder, which will be replaced with the username and temporary password respectively.

Email subject
Your temporary password

Email message
Your username is (username) and temporary password is (###).

You can customize the message above and include HTML tags, but it must include the "(username)" and "(###)" placeholder, which will be replaced with the username and temporary password respectively.
